

**EU Strategy for the Danube Region (EUSDR)
PA 4 Steering Group Meeting – 9.6.2015 Budapest**

**EUSDR - Activities and Perspectives
of the Baden-Württemberg Ministry of the Environment,
Climate Protection and the Energy Sector**

Carmen Hawkins
Unit Europe and International Cooperation

Ministry of the Environment, Climate Protection and the Energy Sector Baden-Württemberg

= Member in 5 Steering Groups

- PA 2 Energy
- PA 4 Water Quality
- PA 5 Environmental Risks
- PA 6 Biodiversity, Landscapes, Quality of Air and Soils
- PA 8 Competitiveness (Transfer of Environmental Technologies)

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

A. Intentions and focus of activities

- Baden-Württemberg is playing an active role in the EU-Strategy for the Danube Region.
- Ministry of the Environment, Climate Protection and the Energy Sector wishes to enhance the **implementation of modern environmental technologies** in Danube Region.
- Modern, innovative technologies help to reduce **energy consumption and use of resources** and save money.
- Founder of **PA 8 Working Group Environmental Technologies and Energy Efficiency**

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

B. Activities

- **Exchange of experience and knowledge**

with governments, counties and municipalities in the Danube Region

The exchange of experience and knowledge can take place through mutual visits of delegations in Baden-Württemberg or discussions with experts

Goal: Support local authorities, prepare for the implementation of modern environmental technologies

- **Development of projects**

The main goal is to develop projects and organize project funding.

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

B. Activities:

- 2-weeks-visit of Ms. Gabriella Krempels Murányiné, Head of the Department Water Management, Hungarian Interior Ministry in Feb. 2013

<http://um.baden-wuerttemberg.de/de/ministerium/internationale-zusammenarbeit/eu-donauraumstrategie/hospitationen/>

- Different visits of delegations from Serbia and Bulgaria

<http://um.baden-wuerttemberg.de/de/ministerium/internationale-zusammenarbeit/eu-donauraumstrategie/informationsreisen/>

C. Presentation of Projects

1. Environmental Technology Network Danube Region (ETNDR)

Organizer of PA 8 Working Group

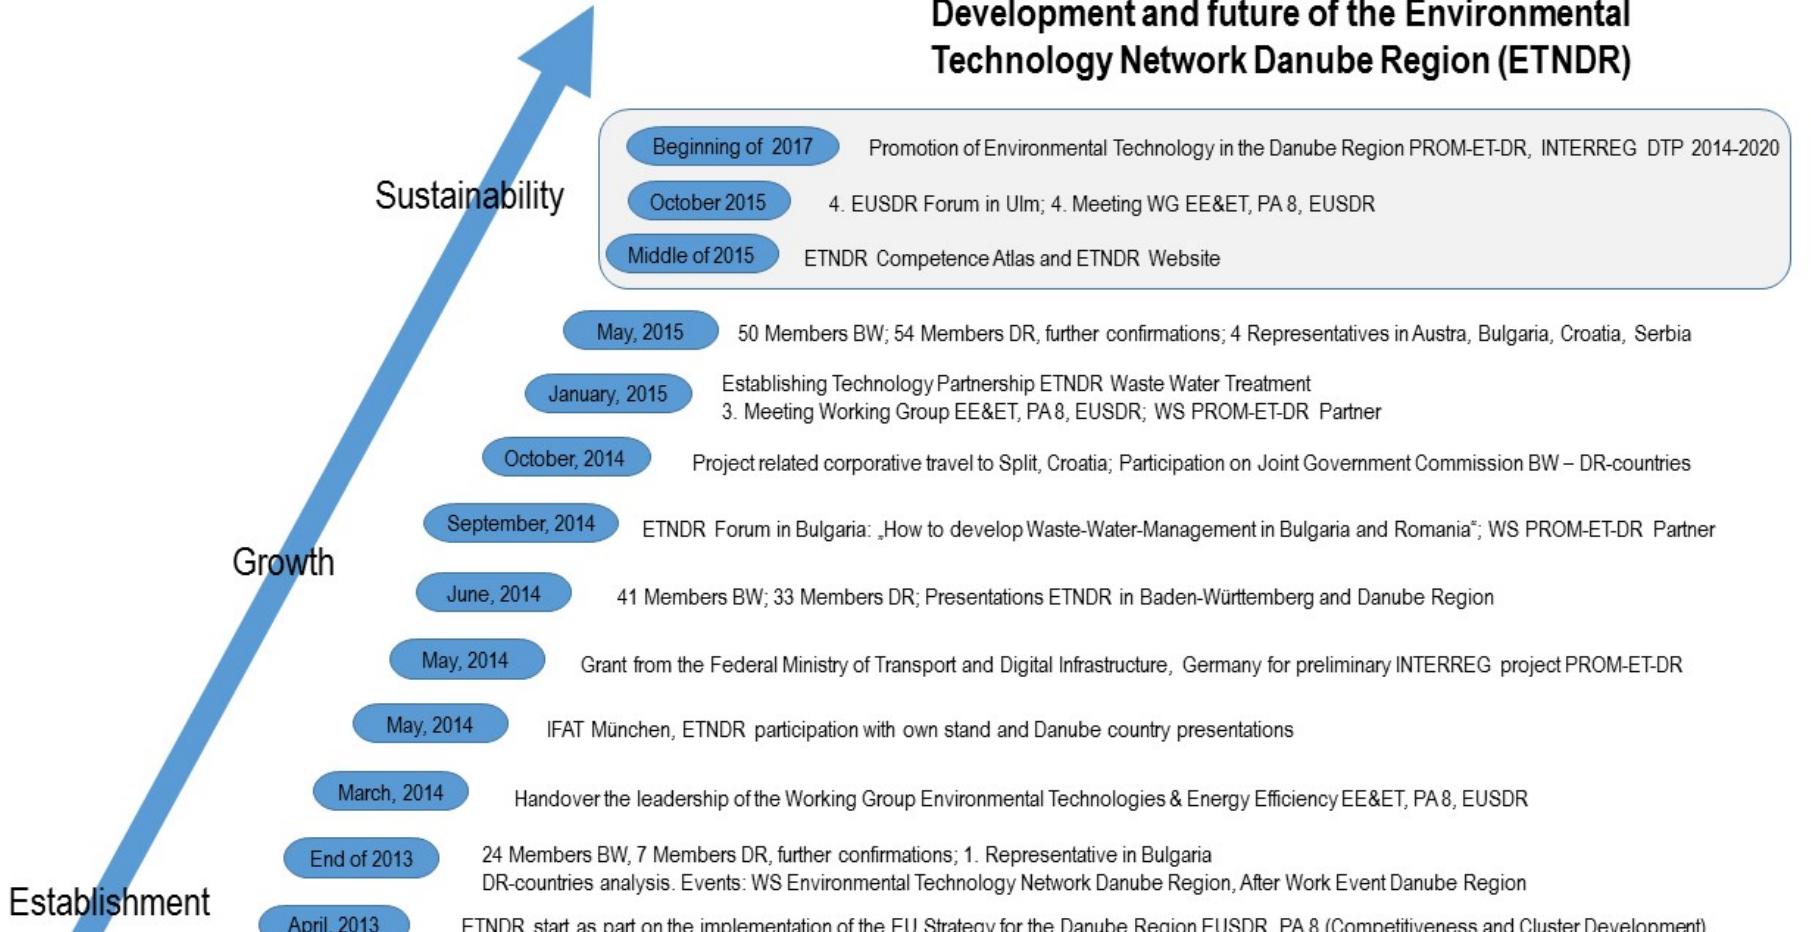

“Environmental Technologies and Energy Efficiency”

Project/network focusses now **on Waste Water Treatment and Sludge Management**

Goals

- Carrying out sustainable improvements to the environment in the Danube Region
- Increasing market opportunities for environmental technologies
- by connecting stakeholders (public institutions, research institutes and companies)

Development and future of the Environmental Technology Network Danube Region (ETNDR)

1. Environmental Technology Network Danube Region (ETNDR)

Internet:

<http://um.baden-wuerttemberg.de/de/ministerium/internationale-zusammenarbeit/eu-donauraumstrategie/projekte/umwelttechniknetzwerk-donauraum/>

Contact Details:

- **Rumjana Hilpert**
Project Manager EU Strategy for the Danube Region & ETNDR
Telephone +49 7031 20398-31
rumjana.hilpert@umwelttechnik-bw.de

Project Manager Environmental Technology Network Danube Region (ETNDR)
Telephone +49 7031 20398-25
desislava.petkova@umwelttechnik-bw.de

C. Presentation of Projects

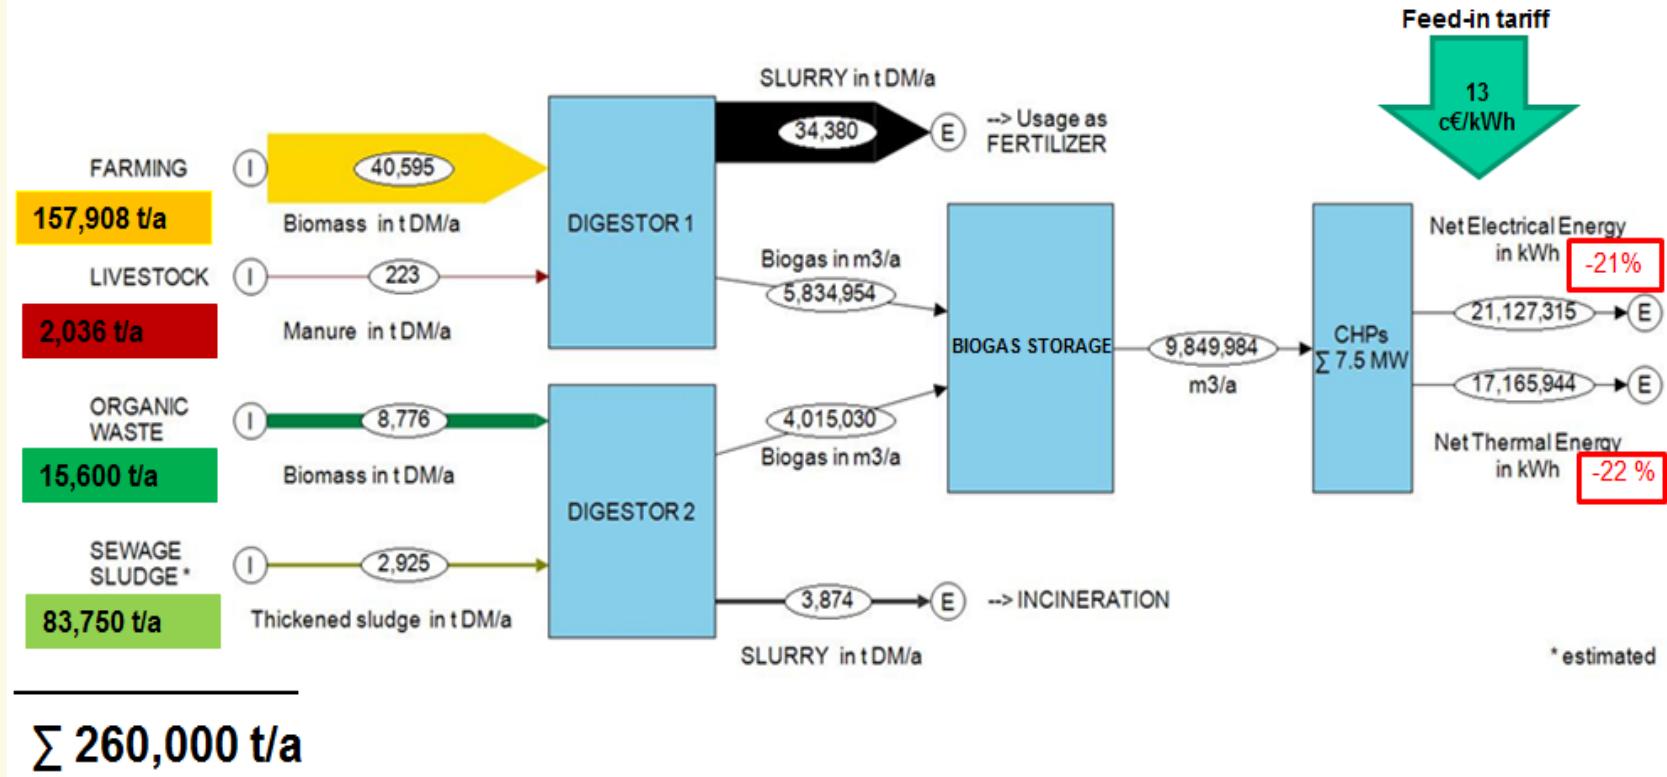

2. Integrated management of wastewater, biomass and energy in the municipalities of Stara Pazova and Indjija, Serbia

- Proposal of the **sustainable wastewater management concept**
 - Regional organic material flows such as bio-waste and agricultural residues are incorporated in the WWM concept, aiming on the generation of a regional added value (e.g. additional energy)
 - The selected region will serve as a pilot region → transferability to the other Serbian communities / other Danube regions communities
- Serbia applied for € 43.5 Million IPA funding for the project realistation

Possible Scenario: Energy and Material Flows

115,000 Inhabitants

© Universität Stuttgart, ISWA

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

- Baden-Württemberg funded two follow-up projects in Serbia carried out by the University of Stuttgart, ISWA:
 - **“Support for planning and conduction of a wastewater measurement campaign”** which aimed at the determination of precise pollutants loads for subsequent WWTP planning phase in Stara Pazova.
 - **“Impact of Wastewater Discharges on Water Quality”** - Danube River water quality samples and sediments were collected upstream and downstream (wastewater discharge) and analysed in cooperation with the University of Novi Sad with regard to standard parameters, heavy metals and micro-pollutants.

2. Integrated management of wastewater, biomass and energy in the municipalities of Stara Pazova and Indjija, Serbia

C. Presentation of Projects

3. Training module for the waste water sector in Croatia

- Modern sewage treatments need suitably trained and skilled personnel.
- **Training and Competence Center (TCC) Danubius** in Ulm developed a six-weeks-modular course including all necessary documents (lectures, exercises and test, information leaflets) in Croatian.
- funded by the Ministry of the Environment, Climate Protection and the Energy Sector Baden-Württemberg (approx. € 80,000)

3. Training module for the waste water sector in Croatia

- Training course is available in Croatian for neighboring countries (with similar language) and for translation into other languages

AND THE ENERGY SECTOR

C. Presentation of Projects

4. Sewage sludge incinerator in Eger (HU)

- Project arose from a cooperation of Environmental Technologies Platform B-W (Plattform Umwelttechnik e.V.) and hungarian entrepreneur Ferenc Morvai, Biomorv.
- Sewage sludge incinerator burns wet sludge right at the spot of the waste water treatment plant and produces heat and electricity.
- Waste gas and all other processes of the plant were examined by joint institutes of Universities of Stuttgart and Budapest to control the environmental impact of all processes.

Baden-Württemberg funded two sub-projects:
The examination and the optimization of the plant with regard to
compliance with EU standards. This will help the project towards
achieving market maturity.

The projects are carried out by the University of Stuttgart, ISWA
(Institute for Sanitary Engineering, Water Quality and Solid Waste
Management) at the University of Stuttgart in cooperation with the
University of Budapest.

D. Project Funding

- State Ministry Baden-Württemberg
EUSDR-Fonds € 400,000 p.a.
For all 11 Priority Areas of EUSDR
Environmental Technologies, Renewable Energies and Energy Efficiency is one of the key aspects of the fonds
In general 2 ET-projects are funded each year
Ministry of the Environment, Climate Protection and the Energy
BW will support applications

D. Project Funding

- Ministry of the Environment, Climate Protection and the Energy
BW generally has no funding

Exceptions: in 2014 three projects (€ 186,000) were funded (Eger (HU), TCC Danubius (HR), Stara Pazova (SRB)

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

E. INTERREG V b Danube Region Project Idea from BW

1. Promotion of Environmental Technologies in the Danube Region (PROM-ET-DR)

The main objectives: Transfer, Development and Implementation of Innovative Waste Water Treatment and Sludge Management in the Danube Region (WWT&SM-DR).

Project Partners:

8 partners from Austria, Bulgaria, Croatia, Germany, Hungary, Romania, Serbia and Slovakia.

Lead Partner: Umwelttechnik BW with the ETNDR, Baden-Württemberg.

Partnerships includes business support center, cluster, energy research institute, water institute.

E. INTERREG V b Danube Region Project Idea from BW

1. Promotion of Environmental Technologies in the Danube Region (PROM-ET-DR)

Partner Search (outside Germany):

Hungary: university with focus on WWT&SM

Slovakia: county council, municipality or water association

Romania: county council, municipality, politically operating organization or some suitable NGO.

Contact:

Rumjana Hilpert, ETNDR

Baden-Württemberg

MINISTRY OF THE ENVIRONMENT, CLIMATE PROTECTION
AND THE ENERGY SECTOR

E. INTEREG V b – Project Idea

2. Development of Strategies and Tools for Sustainable Water Management in the Danube Catchment2

- For ecological and chemical water quality it is of particular importance nutrients input from raw and treated wastewater, pollution originating from storm water (organic pollution, nutrients, organic and inorganic trace substances), land use and the river basin development.
- Preliminary aim is to develop monitoring strategies as well as holistic chemical and ecological assessment methods for the Danube region.
- Confirmed partners: TU Vienna, Institute for biological research – University of Belgrade, SME Festo Didactic Baden- Württemberg
- the opinion by the PA 4 is vital for decision makers
- Interested partners are welcomed to contact

Ms. Jovana Husemann, University of Stuttgart, ISWA

E. INTERREG V b Danube Region Project Idea from BW

3. Development of regionalisation models for estimating design discharges used for water resources management tasks at the Lower Danube Region (South-Eastern Europe)

Lead partner: National Institute for Hydrology and Water Management Romania

Partners in Baden-Württemberg: KIT Karlsruhe, Wald and Corbe

Goal: To find partners in Croatia, Hungary, Serbia, Slovakia and Slovenia

Contact: Stanka Savova, Tel. +49 7229 / 1876-170,
s.savova@wald-corbe.de

E. INTERREG V b Danube Reg Project Idea from BW

4. OpWaT – Optimum Wastewater Treatment

To improve elimination of organic pollutants during wastewater treatment in industrial and/or municipal facilities respecting cost efficiency.

Partners: Research institute (DE, coord., analytics), SME (DE, online -analyser), Municipal WWTP, research institutes (SLO, RS)

Associated Partners: Municipal WWTP (DE)

Stakeholder: International waterworks association (IAWD), authorities (DE, AT), evtl. ICPDR

E. INTERREG V b Danube Region Project Idea from BW

Partner Search (outside Germany):

- Industrial and municipal WWTPs
- Wastewater / engineering experts (Uni or SME)
- Communication of outcome and results (Uni or SME)
- Training / Transfer of best practice (Uni)
- Water related authorities
