Follow the plastic from source to the sea...

Miklós Gyalai-Korpos | Természetfilm.hu Egyesület, LP

Main message

...improvement of
water quality and
reduction of plastic
pollution of the Tisa
river from its source
to the Black Sea

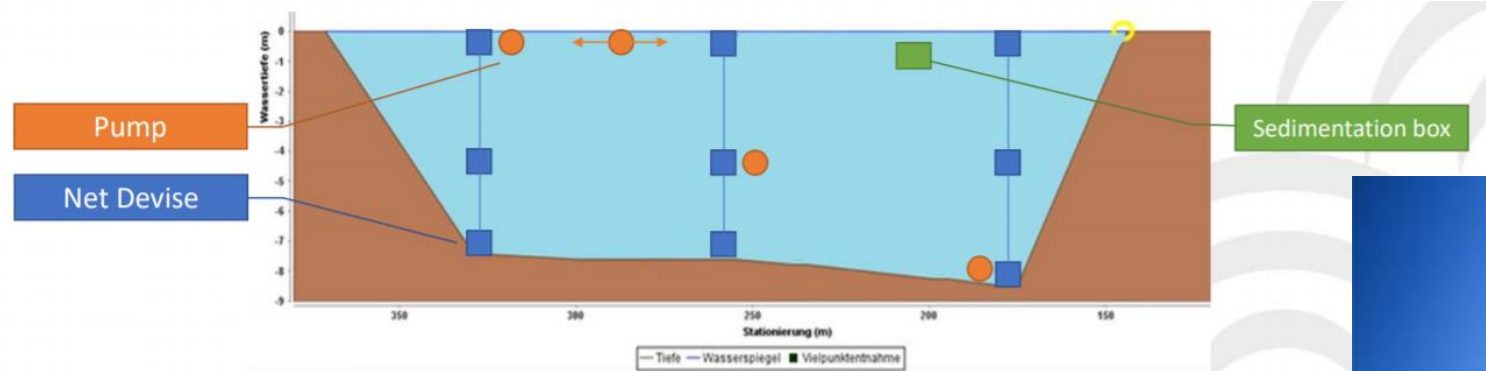

- 10 Partners
- 11 ASPs
- 7 Countries

WP T1 - Methodology – Waste localization and strategy for collection

Microplastic assessment

WP T1 - Methodology – Waste localization and strategy for collection

Macroplastic- Hotspot localization

BORSAVA (UA)

BODROG
(HU-SK)

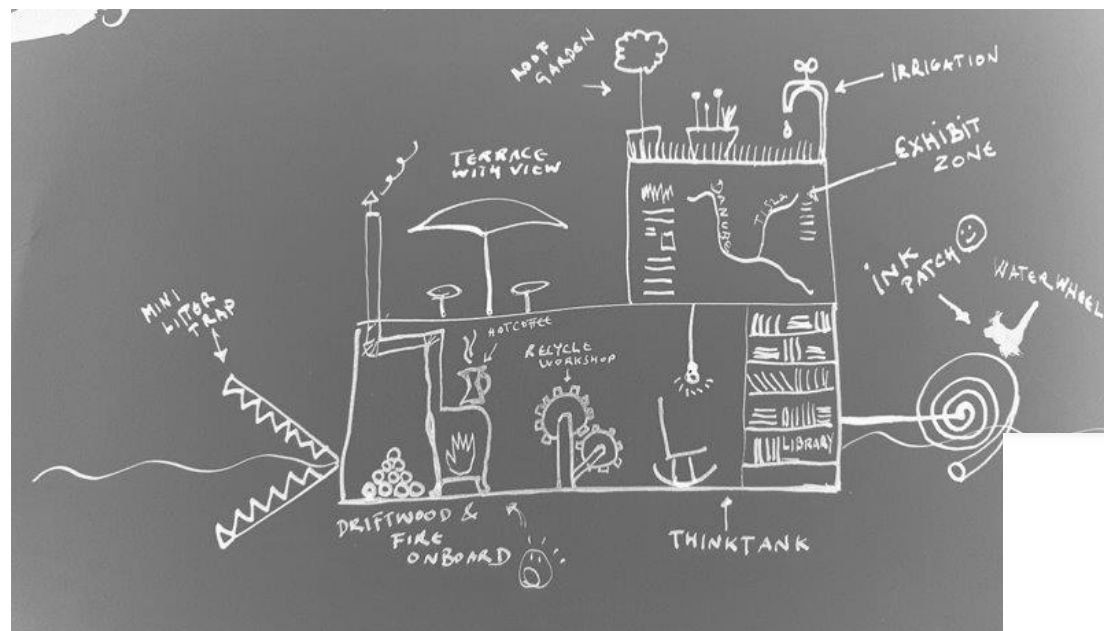

WP T2 - Pilot actions for awareness raising

- **Handguide** – to river clean-ups – How to do it?
- **Study tour** to a Hungarian clean-up action (June 2021)
- Realisation of **4 pilot river clean-ups** (SK, UA-RO, SRB, BG)

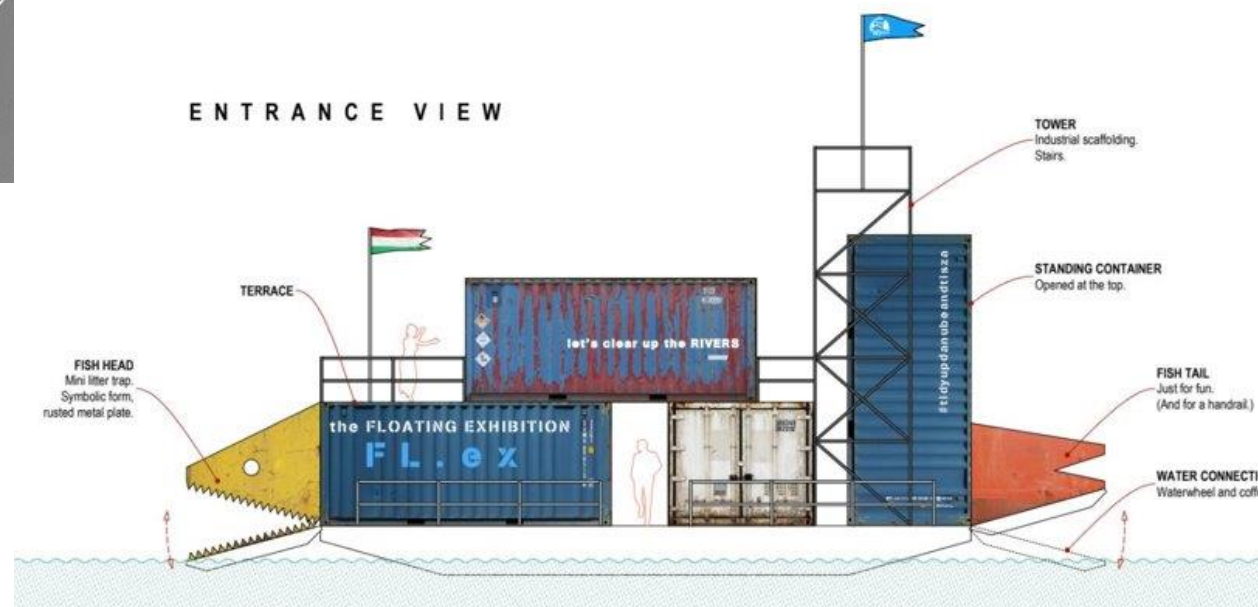

WP T2 - Pilot actions for awareness raising

FLEX - The Floating Exhibition

Floating exhibition traveling to all partners to call attention of the PUBLIC

WP T3 - Involvement and legislation

Roundtable discussions

Involvement of the stakeholders

- Providing them a tool kit to reduce waste
- On regional and national level in all countries
- One big transnational roundtable as highlight of the project

Legislation

Legislative analyses carried out by all partner countries to be summarized in an assessment study

- what to develop on national level
- suggestions for EU-level improvement

Thank you for your attention!
