International Commission for the Protection of the Danube River (ICPDR)

Introduction

- Danube River Basin Management Plan Update 2015
- Danube Flood Risk Management Plan 2015
- Danube Ministerial Declaration as of February 2016
- Work Programmes and Terms of Reference for ICPDR activities in EGs adressing period 2016 to 2018 will be adopted at the upcoming ICPDR Ordinary Meeting
- Upcoming ICPDR Meeting: 19th ICPDR Ordinary Meeting (6 to 7 December 2016, Vienna)

EUSDR PA 04 related ICPDR activities

- 1. Significant Water Management Issues in the DRB
 - Nutrient pollution Sustainable Agriculture Guidance
 - Hazardous Substances
 - Hydromorphology sturgeon related activities
- 2. 2015 Droughts in the Danube River Basin Report
- 3. Adaptation to Climate Change in the DRB
- 4. Integration of water management with other sectors
 - Navigation and the Environment
 - Sustainable Hydropower Development
- 5. ICPDR related projects including REVISTUR

1. SWMIs – Nutrient Pollution icpdr iksd and Sustainable Agriculture International Commission for the Protection of the Danube River of the Danub

Development of a **guidance document** on sustainable agriculture to **reduce nutrient pollution** from diffuse sources in the DRB

- To recommend sound policy instruments, programs and targeted, cost-efficient agricultural measures
- To contribute to sustainable agriculture by balancing the economic, ecologic and social aspects of agriculture and rural development

Questionnaire related to nutrients related policies and measures implementation in agriculture was prepared and sent out to Danube countries.

D Delivery

1. SWMIs – Hazardous substances

Development of a a pre-study for hazardous substances in the Danube River Basin (data availability and project proposal development)

- Hazardous substances pollution: one of the major concerns in respect to water status but underrepresented due to lack of data
- First step: to evaluate the sources and pathways of the pollution being released into the water bodies
- Second step: determination of appropriate measures to reduce pollution and assessment their efficiency
- Outcome of the study will facilitate 1) the setup of a suitable model framework, 2) the selection of appropriate study areas for detailed analyses, 3) the development of a reliable database for modelling and 4) serve project preparation

1. SWMIs – Hydromorphology and sturgeon related activities

Monitoring Study on sturgeon behaviour Iron Gates (RO, BG, RS) in lower Danube finalised in February 2016 (financed by EIB); final report is available.

for the Protection zum Schutz

- STURGENE Project (Ex-situ survey to preserve sturgeon genetic diversity in the Middle and Lower Danube) finalised in April 2016 (financed by EUSDR); final report (including roadmap) is available.
- LIFE Sterlet Upper Danube restoring sterlet populations in the upper Danube ongoing; BOKU Vienna and partners, Sept 2015 to Dec 2021, financed by EU LIFE.
- Revival of Danube Sturgeons: Concerted basin-wide actions to safeguard sturgeons in the Danube Basin (REVISTUR project) – project proposal in preparation, BOKU Vienna and partners, 2nd call of Danube Transnational Programme.

1. SWMIs – Hydromorphology and Development ToR Fish Migration Iron Gates I & II

- International Commission for the Protection of the Danube River
- Main objective to develop, evaluate and rate potential solutions to ensure upstream and downstream migration of fish, and in particular sturgeons, at the Iron Gate dams I & II. Draft ToR available for discussion at OM-19.
- Proposed work packages
 - Work package 1 Analysis current situation and data gathering;
 - Work package 2 Monitoring fish behaviour;
 - Upstream migration;
 - Downstream migration & survival rate turbines IG I & II;
 - Work package 3 Modelling hydraulic conditions;
 - Work package 4 Alternatives study;
 - Work package 5 Communication and stakeholder involvement.
- Proposed duration/finances: 4 year project; 2,3 3,2 Mio EUR.

2. Droughts in the Danube River Basin

- First draft outline of "2015 Droughts in the Danube River Basin" Report presented in spring RBM EG Meeting in 2016
- Replies to Questionnaire received from 13 Danube countries
- Report includes
 - information about the meteorological and hydrological situation (chapter 3),
 - impacts and measures (chapter 4) and
 - lessons learned and conclusions for national and Danube basin wide level (chapter 5).
- Ready for adoption at the OM-19

3. Adaptation to Climate Change

ICPDR Strategy on Adaptation to Climate Change and its knowledge base will be updated by 2018

- Germany, Austria and Serbia are acting as lead countries
- 2017: Update of scientific research study from 2011 (Munich University) with reactivation and involvement of voluntary "Team of Experts"
- Beginning of 2018: Climate Change Adaptation Workshop, discussing the latest scientific findings and providing input for the update of the Climate Change Adaptation Strategy
- During 2018: Update of Climate Change Adaptation
 Strategy with involvement of relevant ICPDR Expert Groups and adoption at OM in 2018

4. Integration issues – Sustainable Hydropower Development

ICPDR Workshop on Sustainable Hydropower in the Danube River Basin: Progress, solutions and remaining challenges

- Meeting date and venue: 28 to 29 March 2017 in Vienna (AT)
- Workshop concept available for adoption at OM-19
- Excursion (Hatchery station sterlets Donauinsel & BOKU testing laboratories at Nußdorf)
- Structured discussion supported by professional moderators

19th Ordinary Meeting 10

4. Integration issues – Navigation and Environment

- 7th Joint Statement Meeting organised by Danube Commission, together with ISRBC and ICPDR from 15 to 16 September 2016
- Mixed Environment Transport External Expert Team (METEET) on Integrated Planning of Inland Waterways Transport (IWT) Projects set up by European Commission, DC and ICPDR

19th Ordinary Meeting 11

Thank you for your kind attention!
