## WORK PACKAGES

### WPT1

*Development of a transnational knowledge base on the applicability of MAR in CE*

- involvement of stakeholders on national and transnational level
- collection of good practices and benchmark analysis of existing MAR solutions
- trainings for stakeholders via Webinars

### WPT2

*Development of a transnational assessment methodology for decision-making on MAR locations in CE*

- determination of the most appropriate sites in CE for the location of MAR
- selection of areas that will be mostly affected by climate change and where MAR could be more needed
- development of a common decision supporting tool for MAR sites location

### WPT3

*Feasibility assessment of establishing MAR schemes in CE*

- common methodology to conduct feasibility studies
- pilot feasibility studies carried out in 4 countries
- preliminary assessment of the environmental impact of potential implementation

### WPT4

*Development of policy recommendations and national action plans*

- development of policy recommendations in line with current legislations and regulations
- technical guidelines dedicated to the adoption of MAR
- discussions with relevant stakeholders to ensure their support and suggestions
- roundtables with decision takers
